## **SPA and Pools**

### **SPA**

- ***Cryotherapy***

Reducing inflammation and effectively reducing the signs of ageing is possible not only through an active lifestyle and a balanced diet, but also through cryotherapy.

Cryotherapy involves staying for a short time in a special cabin that maintains a very low temperature of around -85° Celsius. This therapy stimulates the circulatory system to respond, helps to recover quickly from sports activity, and reduces inflammation and joint and muscle pain. In addition, it promotes weight loss, makes the body burn calories, speeds up the basal metabolism and tones the skin by increasing collagen production.

The novelty of this procedure at Fonteverde lies in the special combined effect of cryotherapy and warm thermal water, which together increase the effectiveness of the procedure and trigger vascular exercises, improve blood microcirculation and stimulate the production of endorphins, creating an overall feeling of well-being.

- ***Fitness centre***

At the Fonteverde Fitness Centre, you will have free access to a large fitness area.

You can alternate between 50-minute scheduled fitness sessions with a personal trainer or 25-minute group fitness sessions in the gym and cardio area. Entrance to the gym and cardio fitness area is free for hotel guests.

The large pool takes you from inside the room, with its glass window, to the outside overlooking the panoramic landscape of the Val d'Orcia.
