Hydrokinesis Center

The therapeutic use of thermal water and the knowledge of the personal trainers, physiotherapists and wellness experts are the starting point for personalized rehabilitation programs that include the use of the gym and treatments such as massage, wellness and hydrokinesis therapy to make you recover and feel well again.

The center makes available a gym where to exercise freely and the Kinesis gym for rehabilitation exercises or athletic training under the supervision of our personal trainers. The center is specialized in rehabilitation programs for arthro-rheumatic, post-traumatic and post-surgical conditions.

Rehabilitation and kinesiological therapies are even more effective thanks to the muscle-relaxant and pain-relieving properties of thermal water.

This allows providing a full hydrokinesis treatment that can speed up recovery time, reducing pain and reflex muscle contraction.

The Hydrokinesis Center featuring therapy in thermal water thanks to a large rehabilitation pool and two private pools. In addition, the center offers a rehabilitation gym and an area dedicated to massage therapy and physiotherapy. Doctors specialized in a vast variety of medical sectors call this center their home.

The Spa combines wellness, sports, fitness and relaxation treatments in thermal water with exercise and sports under the supervision of a personal trainer.
